Northwestern Medicine Takeaways

Building EHR Solutions (Integration with EPIC)

Can you clarify what you mean by the payers paying for medical, but not the carve-out behavioral health coverage?

Can CPT Codes 99406 and 99407 be used for vaping and other substances that are inhaled like marijuana?

If someone is conducting telehealth from home, do they document it in the note as a point of service, and is there a difference in reimbursement for phone versus video versus in office?

Suggestions on how to contract with insurance companies for small groups to get their mental health clinicians to provide integrated care in the practice without joining the mental health IPA's like Beacon or Magellan?

How does 99452 differ from other digital evaluation codes, 99421 to 99423?

How do you make the billing and coding work for collaborative care in a small practice setting?

At what rate does a collaborative psychiatrist get paid?

Parting thoughts

If a physician provides smoking cessation counseling for e-cigarette vaping for eight minutes, may CPT code 99406 be reported?

Interactive complexity coding • This concept was a component of the old evaluation and therapy Per CMS when coding interactive complexity requires: At least one of the following must be identified in the documentation

The use of \"supports\" in communications for Interactive Complexity

Examples of when 90785 would be correctly appended . During court ordered therapy the patient is angry and explosive

Disclosure of a sentinel event when coding Interactive Complexity

The time involved with the \"interactive complexity\" • The time this portion of the encounter takes with the patient

Template for Interactive complexity...

Support interactive complexity...

96156 Health behavior assessment, or re-assessment (ie, health-focused clinical interview, behavioral observations, clinical decision making) A health behavior assessment identifies psychological, behavioral, emotional, cognitive, and relevant social factors that can prevent, treat, or manage physical health problems. The assessment must be associated with the patient's primary diagnosis, which is physical in nature, and focus on factors that could complicate the medical condition and treatment

Assessment is undertaken using a health-focused clinical interview, observation of behavior, and clinical decision- making, and includes evaluation of the patient's response to physical health problems, outlook and coping strategies, and adherence to treatment plans, Preventive medicine counseling and risk factor reduction interventions are not included.

A provision in the Patient Protection and Affordable Care Act of 2010 (ACA) established a Medicare Wellness Visit, which included a Health Risk Assessment (HRA) and customized wellness or prevention plan. HRAs are typically completed by a patient or caregiver prior to the encounter with a physician or other qualified health care professional, but can involve the assistance of the clinician and/or staff members. The HRA tool is purposefully designed to be brief, straightforward, and easy to comprehend with questions such as patient demographic information, personal and/or family history, a self-assessment of how the patient interprets his/her health to be, risk factors, biometric measurements, and compliance. Completion of the HRA tool takes approximately 20 minutes and may be done via the internet or on a paper-based document.
